ACADAMIC PROJECT

NGO Management System

This software portion entitled "NGO management system" is very useful for any non-government organization to develop its social services in a more effective manner. So that they can improve society without any poverty and illiteracy. The module is used to display the nongovernment organization information like their name, place, history of the NGO, when they established their organization, president of the organization, vice president, number of members of the NGO, etc. Past work module is used to display the NGO's exiting service for society.
